**DETAILED ACTION**

***Status of the Application***

1. This action is in reply to applicant amendment filed December 01, 2008.
2. Claims 1-2, 4, and 9-16 have been amended.
3. Claims 17-20 have been cancelled.
4. Claims 21-24 are new.
5. Claims 1-16 and 21-24 are pending in this application.

***Election/Restrictions***

6. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13 and 21-24, drawn to a method for presenting a digital paper bill comprising associating a stored consumer biometric signature with the bill and creating the digital paper bill using the data relating to the bill and the digital paper pattern, classified in class 705, subclass 76.
  - II. Claims 14-16, drawn to a method for presenting a digital paper consolidated bill comprising receiving data relating to at least two distinct bills, each of the at least two bills received from a distinct one of a plurality of merchants, each of the at least two bills including bill data and bill summary data associated with the respective distinct bill, classified in class 705, subclass 34.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as consumer authentication and data encryption. Subcombination II has separate utility such as bill consolidation and comparison. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement, to be complete, *must* include an election of the invention to be examined, even if the requirement be traversed (37 CFR 1.143).

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Faris Almatrahi whose telephone number is (571) 270-3326. The examiner can normally be reached on Monday to Friday 9:00 AM - 5:00 PM.
